

To ensure that the quality of our products remain at the forefront of the industry, we are constantly striving to improve our designs and sometimes make revisions to our products. With our Alpha Macan High-Flow Air Filters, changes were made to improve install-ability and fitment.

## Macan 4 Cylinder Models (Only)

01. Install included adhesive-backed foam block into filter housing, and place into filter housing as shown:

02. Slide filter housing cover onto the filter housing until it is in place. Some downward pressure may need to be applied to the filter so that the features on the filter housing cover clear the edges of the filter.

03. Verify that the filter outlet is lined up correctly with the housing cover as shown below:
